

Lithium Iron Phosphate (LFP)

Narada MPLhE series 51.2V LFP battery modules are ideally suited for telecom base station, OSP, and renewable energy applications with a max charge voltage of 58.4V. Ideally suited where voltage drop is a concern and it eliminates the need for voltage boosters in the power loop.

MPLhE series offer long cycle life, small size, reduced weight, and simplified installation as 19"/23" rack mountable modules. MPLhE LFP chemistry makes it one of the safest technologies, suitable for high and low temperature operation and capable of 1C and higher discharge rates.

Features

- Simple installation and load/charge system integration (Pos/Neg termination)
- Advanced intelligent lithium battery management technology
- Energy transfer patented technology provides high cell utilization efficiency for prolong system operational life
- Configuration flexibility, support parallel connection expansion up to 16 modules

Compliance

- UL1642, Standard for Lithium Batteries
- UL2054, Standard for Household and Commercial Batteries
- UL1973 Certified
- UL9540A tested – No Thermal Runaway
- EN 61000-6-1:2007, Electromagnetic compatibility (EMC)
- EN 61000-6-3:2007+A1:2011, Electromagnetic compatibility (EMC)
- IEC 62133:2012, Battery Safety Testing
- UN 38.3

BMS – Alarming - Communication

- System monitoring of voltage, current, temperature of cells and module. Built in protection against over-current on discharge and recharge, over-temperature, low temperature, low and high voltage, and short circuit
- BMS maintenance and service communication via RS485 along with Modbus for simple interface with Inverters and other equipment
- 2 levels of remote alarming through dry contacts

Dimensions and Specifications
